CUSTOM PRINTED APPAREL

SCREEN PRINTING - DIRECT TO GARMENT - HEAT TRANSFER

SCREEN PRINTING

Custom screen printed shirts and hoodies are great for your team, your business, your wedding party, your family reunion, your fundraiser, or any other occasion that brings people together. Steve Thompson Art offers full color traditional screen printing on all types of apparel.

DIRECT TO GARMENT

Direct to Garment printing is a process by which a digital image is printed directly on to your apparel using cutting edge printers and inks. This process allows designs in any quantity with highly detailed, full color results at an affordable price.

HEAT TRANSFER

Designs are directly applied to any garment with an "iron-on" process that uses heat to adhere to the fabric. Best for 1 or 2 color designs, but multiple color designs are also possible.

With this process custom garments can be created. IE: adding player name and number to team apparel.
